Fadia Latrech

Computer engineering student @ ESPRIMS

Summary

As a dedicated student pursuing a degree in Computer Science at ESPRIMS, I am passionate about developing my skills in software development, web design, and project management. Throughout my studies at ISET Mahdia, I gained experience in software engineering and information system development, developing a strong foundation in programming languages such as Java, Python, and MongoDB.

I am a motivated and collaborative individual, eager to learn and grow both personally and professionally. I have experience working in diverse teams and adapting to new challenges, which has honed my ability to communicate effectively and think critically. Through internships and extracurricular activities, I have developed my skills in problem-solving, time management, and leadership, making me an asset to any organization.

Currently pursuing an engineering degree in Computer Science, I am excited to continue building my skills in software development and contribute to innovative projects. As a student, I am eager to explore opportunities to gain hands-on experience and work alongside industry professionals. I am committed to making a positive impact through my work and am excited to see where my passion for technology will take me.

Experience

LEADERPOS

Web Development Intern

August 2022 - September 2022 (2 months)

Sfax, Tunisia

I developed a user-friendly web application using MERN stack that allows patients to book appointments with doctors. The application simplifies the appointment booking process by allowing patients to send appointment requests and enabling doctors to accept or reject them. This streamlined solution saves patients valuable time while also reducing the administrative

workload of healthcare providers. Through this project, I gained practical experience in full-stack web development and learned how to design and implement an intuitive and efficient application that meets the needs of both patients and medical professionals.

WEGO

Web Development Intern

March 2022 - June 2022 (4 months)

Mahdia, Tunisia

During my end-of-study internship, I had the opportunity to create a live streaming platform based on MeSh network for an open online course. This involved developing an end-to-end video streaming connection using the MERN stack, which I was learning concurrently.

Through this project, I gained practical experience in building scalable web applications and integrating complex technologies. I developed my skills in full-stack development, cloud computing, and video streaming, which enabled me to deliver a high-quality and user-friendly platform.

My internship provided me with a challenging and rewarding experience that allowed me to apply my skills in a real-world context while expanding my knowledge in software development.

LEADERPOS

Mobile development Intern

January 2022 - February 2022 (2 months)

Sfax, Tunisia

Throughout my internship, I had the opportunity to create and design a mobile application using Flutter. The app I developed was designed to help users track their expenses, providing a user-friendly interface that allows for easy input of expenses and tracking of spending patterns.

I was responsible for the entire design and development process, from conceptualization to implementation. I worked closely with my team to ensure that the app met the needs of our target users and was intuitive and easy to use.

Through this internship, I gained valuable experience in mobile app development, including the use of Flutter, an open-source mobile app development framework. I also gained a deeper understanding of the importance of user-centered design and the role of mobile applications in addressing real-world problems.

Overall, my internship was a rewarding experience that allowed me to apply my skills in mobile app development and contribute to the development of a useful tool for managing expenses.

Tunisie Telecom

Intern

January 2020 - February 2020 (2 months)

Ksar Hellal, Monastir, Tunisia

As a customer service intern at Tunisie Telecom, I developed my skills in handling customer inquiries and providing support through various channels. It was a valuable experience that allowed me to learn and grow both personally and professionally.

Education

ESPRIMS' - Ecole Supérieure Privée d'Ingénieurs de Monastir

Bachelor's degree in Computer Engineering, Advanced Web & Mobile Development. · (September 2022)

Higher Institute of Technological Studies of Mahdia (ISET Mahdia)

License's Degree in Information Technology, Information Systems Development (DSI) · (September 2019 - September 2022)
